History, Education

ABOUT

As a *Web Developer/PSM* with a strong background in customer service, I possess a strong work ethic and a great team player attitude. I thrive on performance and a fast-paced atmosphere.

PROJECTS

Hapcast Project

- Hapcast is another freelance project that I'm currently working on. While not my idea, I have been brought on to design certain aspects. Here is an example of a "Sign UP" page I have created.
Link to Project: https://goo.gl/jx1h2K

Freelance Project

- Finer Details Cleaning project was my very first time working with a client. This website is built using Angular and styled with SASS. This was a great learning experience.
Link to Project: https://goo.gl/FRwrsN

Travel App

- This is a full stack app, using angular for the front-end and Rails with the back-end. This app was made for tourists to find things to do while visiting cities across the United States.

Front-End: https://goo.gl/Ih1GQ2
Back-end: https://goo.gl/2w6TeW

Experience

Chenega Sciences, Appian Business Modeling Designer/PSM: *Sept 2018 - Current*

- Refine and translate system software requirements specifications into structured Appian application programs.
- Work in an Agile environment and collaborate with Marines to pinpoint their exact needs.
- Create BPM work-flows, configure and extend Appian objects and implement system logic necessary to satisfy company requirements.

CIBT Visas, Front-end Web Developer: *January 2018 – Sept 2018*

- Worked with a custom CMS, installing websites and fixing HTML, CSS and JS errors
- Technologies used ranged from vanilla JS to ES6, along with JQuery elements to improve functionality. I'm also responsible for all RWD in mobile versions.
- Used Github for version control and work flow. Any issues were submitted via Asana/Jira

TATrilogy Web Dvelopment: *January 2017 - January 2019*

- Teaching assistant for courses being taught at Trilogy. Full Stack Web Development courses, such as JS, HTML, CSS, React, Github, Bootstrap and much more.

RV Trader, Contract Web Developer: *July 2016 - December 2017*

- Expected to use Photoshop and Illustrator to replicate text, gradients and make sure exact specifications were met. Mock-ups were made only with 1366px dimensions, then it was my responsible to code these Mock-ups with RWD in mind.
